Sales of Beer Under Review By Committee

CALGARY, May 22.—(CP)—Most beer parlor operators obtain 100 per cent. gross profit on keg beer sold by the glass, and the large "heads" of foam are the result of the rush to serve customers, Charles Trautwein, president of the Alberta Hotel Association, told the legislative committee inquiring into the Alberta beer and liquor situation at its public hearing here Saturday.

The beer parlor licenses pay \$16 for a keg of beer which is sold by the glass for \$22. "Some hotels get less and others get more. Most of them are likely to get more," said Mr. Trautwein in answer to a question by Mayor Andrew Davison, M.L.A., one of the three members of the committee.

Hon. E. C. Gerhart is chairman of the commission and H. E. De Bolt, M.L.A., Spirit River, the other member.

INCREASES SOUGHT

Sidney Balduf, president of the Army and Navy Veterans' Association, urged an increase in the quota of beer allowed for sale on association premises. R. Gardiner, president of the Hillcrest Miners' Literary and Athletic Association, also sought more beer for his organization.

Mr. Trautwein and Rev. Ben Spence, Edmonton, secretary of the Associated Temperance Forces of Alberta, were the afternoon speakers.

"The one-glass policy for beer parlors," said Mr. Trautwein, had been passed by the Alberta Liquor Control Board.

The additional profit resulting from the decrease in the size of the glass from the former eight ounce, varied according to the individual licensee and he could not estimate the amount.

When a keg of beer was tapped a wastage of \$1 to \$2 worth of beer occurred in foam, depending upon the experience of the man who opened the keg and the distance the beer was piped.

It had been charged that in some hotels the customer received as low as six ounces of beer in the glass, due to the "head," said Mayor Davison.

SLOWER SERVICE
"That is quite possible. The only way it could be overcome is by slower service," replied Mr. Trautwein.

To reduce the head, the beer must be allowed to stand. This could not be done with customers apt to create a row unless they were served in a hurry.

"It has been said certain hotels in the north sold beer at \$5 a case to take off the premises. Has the hotel association any control over that?" asked Mr. De Bolt.

"No, that is Alberta Liquor Control board business," replied Mr. Trautwein. The price originally agreed upon by the hotelmen and the board was 25 cents a bottle, six for \$1.50 and 12 for \$2.40 but that schedule was no longer in existence because of restrictions on the sale of off-premise beer. In one case, however, an excessive price had been charged and the proprietor had been dealt with.

He agreed with Mr. De Bolt that a fixed price, defined by law with penalties for infractions, would help the situation.

AREAS TOO SMALL
The local option areas, as defined in the Alberta Liquor Control Act, were too small, declared Mr. Spence, in his brief on behalf of the temperance forces.

In Alberta today it is comparatively easy to get a beer license but difficult for people to get rid of one if it is established in their community," he said.

A license could be granted regardless of the smallness of the population. The final decision on licenses rested with the liquor control board.

No definite voters' list was provided for a poll on whether the district was in favor of going "wet" or "dry." He advocated a vote based upon the municipal voters' list, pointing out an application for the vote would be signed by 25 per cent. of the persons on the municipal assessment roll.

U.S. Plane Ranges Close to Japan
PEARL HARBOR, May 22.—(AP)—A United States heavy bomber proper and bombed Shimushu and Kuroshima Islands in the Kuriles Thursday night, it was announced yesterday. This minor attack, the first in a series of operations made in air strikes along the northern road to Tokyo.

Canadians Taper Off Training For "D-Day"

—Canadian Army Overseas Photo

Training is tough for the Canadian soldier but it makes him the toughest bit of fighting material in the world. Dangerous tasks like mine detecting and mine laying are all in a day's work, as shown in top photo where Rifleman J. W. Huff, Toronto,

removes some TNT during training in England. Even live ammunition is brought into training schemes (lower photo) where machine gun bullets are whining just two feet above those Canucks.

Churchill May Outline Policy For Security

By ALEX H. SINGLETON

LONDON, May 22.—(AP)—Prime Minister Churchill may place before the House of Commons next week plans for world security and a policed peace, in a tribute to a liberation message which will be a psychological shaft aimed particularly at the enemy in occupied countries.

And-long, hard years after the day of his "blood, sweat and tears" cry of defiance—Britain's Prime Minister is expected to repeat in effect those faithful words, this time not to temper British hearts for the uphill struggle, but to remind the confident that a high price still must be paid for victory.

It is likely, too, that he will weave into the foreign policy address, an outline of the Empire's structure newly strengthened by the conference of its prime ministers, and review the economic warfare accomplishments in cutting down the Nazis had been receiving from neutral.

His statement, opening a foreign policy debate, will be offered as an answer to criticism from some quarters that Britain lacks a long-range pattern for dealing with other nations.

Interest in diplomatic matters was pinpointed upon the possibility that Mr. Churchill will chart the course of political and economic collaboration after victory, and give a hint of terms for Germany upon which the European advisory commission has been working. They are subjects which have

Has 53 Plane Bag Russian Ace Gets Hot Reception From Nazis

By HENRY C. CASSIDY

MOSCOW, May 22.—(AP)—Major Alexander Pokryshkin, easy-going Siberian who is Russia's leading ace, is worried for fear the Germans will make him unwilling.

He is credited with shooting down 53 German planes.

His fighter is marked with a star for each victim, and now every time he appears over the front Germans come after him in swarms.

"You ought to see the reception I get," he said with a grin on a recent trip to Moscow.

The most exciting encounter he recalls occurred last year on the southern front. "A group of us," he said, "were attacking a bunch of Junkers 87's when eight Messerschmitts swooped down on us from the clouds. That was a close shave. My plane was a mess when we got back to the airport. It was riddled with bullets and the motor was hit."

"It may not sound very exciting, but it taught me a good lesson, never to let myself be carried away by the excitement of the chase."

He is getting increased attention, particularly among the governments of exiled countries, since indications are mounting that a conference will be held in the near future between Russia, Britain and the United States on world organization.

It is known that the British plan was unfolded for the prime ministers' conference and won their approval. It is understood that it resembles the old League of Nations in many respects but with the military strength to back up its mandates.

Actress Marries
BEVERLY HILLS, Calif., May 22.—(AP)—In a simple private ceremony, Paulette Goddard, film star, was married yesterday to Capt. Burgess Meredith of the United States Army Forces, in a room screen and stage actor. It was the third marriage for each.

HALIFAX, May 22.—(CP)—The cooperation of Lieut. Ross Guy, M.C. of Halifax, with a British army doctor, may result in a valuable contribution to medical science, the Halifax Herald said Saturday.

Lieut. Guy was suffering from his third attack of "traumatic jaundice" when arrangements were made to have him treated by a doctor working on a drug aimed at removing the condition causing jaundice. The doctor's name was not revealed, but he was said to be a colonel in the British army.

Treatments began last March, after Lieut. Guy had been told that if they were not successful it would be "all over" for him, the newspaper said.

Allies Now Using New Type Bridge

WASHINGTON, May 22.—(AP)—

Another new Allied weapon—a knocked-down, portable bridge which can be quickly assembled to replace demolished spans—was disclosed Saturday night.

Announcing its development, the British ministry of supply mission called it the "most successful quick-assemble spanning device now in use under fire" and predicted it "will speed the movement of United States and British armies into Europe."

It is in use in Italy and is being manufactured both in the United States and Britain for the Allied armies.

Called the Bailey bridge after its inventor, Donald C. Bailey, a civil engineer with the British ministry of supply, the bridge "can be put together at great speed and flung over a river or chasm to support the heaviest artillery, armor, and transport," the announcements said.

Gandhi Improves
BOMBAY, May 22.—(CP)—The health of Indian Leader Mohandas Gandhi, recently released from imprisonment, is showing substantial improvement, it was reported last night. His doctors believe he soon will be able to undertake short political discussions.

A few days ago he had recovered sufficiently to attend a two-hour ceremony at Buckingham Palace where he received the Military Cross from the king. He is still regarded as medically unfit for combatant service.

City Man Heads Alberta K. of C.

CALGARY, May 22.—(CP)—A Boileau of Edmonton was elected state deputy of the Knights of Columbus for Alberta at a state council meeting here Saturday. He succeeds R. H. A. Lacey of Medicine Hat who presided at the sessions.

C. C. Connolly, Calgary, district deputy for southern Alberta, was elected director of Knights of Columbus Canadian army units for the province to hold office "for the duration."

Rev. O. A. Meunier, O.M.I., of St. Paul, Alta., told delegates of the good work being done at Boys' Town which is located outside that town.

Other officers elected were: J. O. Pilon, Edmonton, secretary; A. T. Klempfer, Calgary, treasurer; N. P. Supina, Lethbridge, warden; J. J. Brauff, Pincher Creek, advocate.

Raps "Treatment" French-Canadians

QUEBEC, May 22.—(CP)—Rene Chaloult, Nationalist member for Lotbiniere, told the legislative assembly Saturday that French-Canadians training in English-speaking military camps are given treatment that would not be applied in German internment camps.

Premier Godbout assured Mr. Chaloult "that we have for French-Canadians the same feelings he has" and said that "each time I received complaints I notified authorities at Ottawa."

He said, however, he was "not ready" to accept the letters quoted by Mr. Chaloult as "the full truth and don't think the situation is such in training camps."

Mr. Chaloult referred particularly to a letter sent from an Alberta camp in which it was said that "we are ordered to speak English and we are punched if we speak French."

"This is treatment that would not be applied in German internment camps," he said.

Senate Approves Bill to Streamline U.S. Income Tax

WASHINGTON, May 22.—(AP)—The Senate passed Saturday the bill, approved by the House of Representatives, streamlining the income tax to relieve some 30,000,000 taxpayers of their individual obligations and simplifying returns for the 20,000,000 others.

The streamliner's big break for the estimated 30,000,000 taxpayers is contained in section providing that effective next Jan. 1, the present 20 per cent withholding system against wages and salaries will be revised to deduct the full tax liability for persons earning up to \$6,000 a year.

Ram River Oils Ltd. control the Oil and Gas Rights on this extensive acreage, ideally situated from a geological point of view on the Ram River—Clearwater Structure—in the Foothills of Alberta, approximately 70 miles west of Red Deer, providing,

Possible Drilling Sites for Hundreds of Wells in Territory Which Gives Promise of Becoming a Large and Important NEW ALBERTA OIL FIELD

Above is a view of the flare at Ram River No. 2 discovery well, during a series of preliminary tests following the strike of high test oil.

A VIEW OF RAM RIVER NO. 3

Shown at right is a view of steel derrick and boiler house at Ram River No. 3 where drilling has reached a depth of 620 feet. Drilling site for No. 3 production well was selected by Russell V. Johnson, P.E., consulting geologist, and is located 1340 feet north and east of No. 2 discovery well. Of this location Mr. Johnson states, "This location is on the west flank of the structure and structurally higher than No. 2 well. An increased volume of gas should be encountered and I believe that a lesser drilling depth will be necessary to reach the producing horizon." Production engineers for the company are Denton & Spencer, Calgary.

Madison Limestone—the productive stratum in Turner Valley.

BANFF SHALES

A column of crude oil blowing from Ram River Oils Ltd. No. 2 discovery well during a series of preliminary tests following the strike of high test oil.

QUALITY OF OIL

(Excerpts from reports by Mr. M. Van Winkle, Chemist of the University of Michigan)

Specific Gravity: 41.5 A.P.I. The sulphur content of the oil is relatively low—0.16%. The crude oil approximates in characteristics a mid-continent crude oil of comparable A.P.I. gravity. However, it differs from the mid-continent in that the gasoline content is higher than that for the average mid-continent crude, and the lubricating oil content is somewhat less. The sulphur content is lower than that of the average mid-continent sample.

SAMPLES OF THE REFINED OIL

From Ram River No. 3 Discovery Well may be seen at the offices of Ram River Agencies, 223 Wilkin Bldg., 10076 Jasper Ave.

These samples include the various grades of Gasoline, Kerosene, Distillates and Lubricating Oils.

Much of the oil produced in the United States and Mexico is obtained from the Devonian Strata of Paleozoic Age.

F.D.R. Reveals:

Quantity of Lend-Lease Shipments Rises Steadily

By HOWARD FLIEGER

WASHINGTON, May 22.—(AP)—Lend-lease arms and equipment to power a three-way invasion smash at Europe are moving out of the United States at a steadily-growing speed, President Roosevelt told Congress today as he submitted the 15th report on lend-lease operations.

Leads French

Leader of the Fighting French forces driving through German resistance in Italy is Gen. Alphonse Juin, pictured enjoying a quick sandwich snack near Cassino. He was formerly military commander of the Algerian district of French North Africa.

Roosevelt to Have Medical Check-Up

WASHINGTON, May 22.—(AP)—President Roosevelt will visit the naval medical centre in nearby Maryland some time this week for a formal physical check-up to make certain he has thrown off the effects of last winter's influenza and bronchial trouble.

Lagosta Island Taken by Allies

LONDON, May 22.—(CP)—The naval correspondent of the German Transocean agency reported today that the island of Lagosta, off the Dalmatian coast south of Split, is in Allied hands, along with Lissa, in the same group and some

The report shows \$24,250,000 worth of equipment, services and supplies have gone from the United States lend-lease arsenal—nearly three-fourths to Britain and Russia and much of it in recent months.

"China is being helped to the utmost of our ability," Mr. Roosevelt said. But the report itself shows the supplies being flown into that country are only a trickle against the flood of equipment being massed before the Nazi front.

GET REVERSE AID
The report also showed a mounting total of reverse lend-lease. It said: "In proportion to their available resources, our principal allies are putting into this war fully as much as we are, including lend-lease aid."

More than \$1,000,000,000 in planes and parts, a similar amount of guns and ammunition and almost that value in tanks and war vehicles going to the United Kingdom—three-fourths of them in the past year.

In the first 60 days of 1944, the report shows, more than 2,100 lend-lease planes, almost 2,000 tanks and more than 60,000 other military vehicles were sent to other nations, the bulk of them to invasion divisions.

AID FOR RUSSIA
Nearly \$4,750,000,000 in lend-lease aid has gone to Russia, the report says, in the past year. Up to March 1944, America had sent Russia 8,800 fighters and bombers, 190,000 military trucks, 30,000 jeeps, 5,200 tanks and 12,000 other vehicles, 35 per cent of them in the past year.

Here is the report's breakdown of lend-lease: To the United Kingdom, 42.5 per cent; Russia, 27.6 per cent; Africa, Middle East and Mediterranean, 14.4 per cent; China, India, Australia and New Zealand, 12.2 per cent; all other areas, 3.3 per cent.

In the Pacific and Far East almost \$2,000,000,000 worth of lend-lease have been poured into the fight against Japan.

Canada has no lend-lease agreement with the United States and deals with the two countries have been on a cash or exchange basis. Canada, however, has her own system of mutual aid for other Allied countries.

In the Pacific and Far East almost \$2,000,000,000 worth of lend-lease have been poured into the fight against Japan.

Chinese Units Score Victory

CHUNGKING, May 22.—(AP)—Chinese forces, striking westward from the Salween river in Yunnan Province, have successfully concluded the "first phase" of their offensive aimed toward North Burma, the Chinese high command declared.

No elaboration of the victory statement was given but a communique yesterday said an Chinese column had repulsed reinforced enemy forces which counterattacked Friday at Mien-Pai, north of the Burma Road.

The Chinese command said the situation was unchanged in Hsiao province, where last reports said the Japanese were cutting down the enemy's hold on the Pingnan-Hankow railway.

Allied North Burma headquarters announced that American heavy bombers attacked a radio station on Prata Island, 190 miles southeast of Hong Kong, destroying three buildings and severely damaging others. The sweep took the bombers within 275 miles of the Philippines.

Believes Nothing Can Break Down Unity of Empire

SYDNEY, May 22.—(CP)—T. C. Davis, Canadian high commissioner to Australia, in a broadcast last night expressed the belief the British Commonwealth is based on foundations so strong that nothing can wreck it and said its strength lies in the fact that its essence is freedom of each unit to make its own decisions.

Speaking of the recent conference of Empire prime ministers in London, the high commissioner said one might be led to believe that the British Commonwealth of Nations was confronted with the great issue of an imperial federation as against the present system of voluntary association.

"No such issue is involved," he said. "It was settled years ago and is in my opinion for all time."

Canada Observes Empire Youth Day

By the Canadian Press
Special services were held in churches in most leading cities in Canada yesterday in observance of Empire Youth Sunday.

More than 1,000 persons jammed Old St. Andrew's church in Toronto where a message to the Earl of Athlone, Canada's governor-general, from Lord Eton chairman of the Great Britain and Northern Ireland Youth Council, was read.

At Edmonton, approximately 1,000 Navy, Army and Air Force Cadets paraded together for the first time through Edmonton streets to Legislative buildings, where Lieutenant-Governor J. C. Bowen took the salute.

Hundreds gathered at Chown Memorial Church in Vancouver where Gen. E. A. Parker, V.C., general officer commanding the Pacific command, spoke. The occasion also was marked in other churches by special sermons.

At Winnipeg and other Western Canada cities the day was observed quietly with special church sermons.

Murder Charges Are Dismissed

NEW YORK, May 22.—(AP)—Homicide charges against 11-year-old Madeline Kirkland, negro girl accused of slitting a schoolmate's throat, were dismissed today and Magistrate Henry H. Curran transferred the case to Children's court.

Madeline and another schoolmate, Ellen Foster, 12, also a Negro, were taken into custody May 9 after Margaret, a Negro, was stabbed fatally with a paper cutter in a Harlem public school.

Police said Madeline wielded a weapon as Ellen held the other child's arms, and attributed the act to their belief the young child had told school authorities they had stolen school supplies.

Ellen was held as a juvenile delinquent. A grand jury did not indict Madeline.

New Italo Flag

LONDON, May 22.—(CP)—The Vichy radio said yesterday Benito Mussolini has decreed a new flag for Italy. The broadcast said the deposed Duce had ordered the arms of the House of Savoy replaced by black eagle with open wings, perched on a bundle, against a background of green, white and red vertical stripes.

59 Executed

BERN, May 22.—(AP)—A Swiss Telegraphic Agency dispatch Sunday from Chino said the Germans had executed 59 Italians at Granoa May 18 in reprisal for the death of five Nazi soldiers in a torture bombing.

Child Drowns

HAMILTON, Ont., May 22.—(AP)—Jeanette Brown, 13-month-old daughter of Mr. and Mrs. Ambrose Brown, was drowned in a tub in the backyard of her home at 1001 Canfield on Saturday. She fell head-first into the tub.

U.S. Investigates Swedish Firms

WASHINGTON, May 22.—(AP)—The United States state department made known today that a considerable number of Swedish firms are being investigated for blacklisting and action against them probably will be taken within the next few days.

The information came out in connection with a statement by the department that no firm "has been or will be included in the proclaimed list merely because means of pressure may exist by reason of American connections."

Today's announcement was the latest in a series of developments stemming from the efforts of the United States, Britain and Russia to persuade Sweden to stop sending ball-bearings to Germany. The principal Swedish ball-bearing manufacturer is the S.K.F. firm which has American affiliates at Philadelphia and New York.

Every adult human being inhales about 35 pounds of air daily.

Repatriate Liner Sails For Belfast

ALGIERES, May 22.—(AP)—Her South African and Antae passengers discharged, the Swedish repatriation liner Gripsholm sailed yesterday for Belfast with British, Canadian and American prisoners of war and civilians who were exchanged for Germans at Barcelona. Several other returning prisoners who are too ill to travel were taken off and put in military hospitals in Algeria.

LONDON, May 22.—(CP)—Fourteen Canadians, repatriated from German prison camps, are aboard the repatriation liner Gripsholm which is en route to Britain. It was learned today. Names of the Canadian repatriates were not available here.

Maritime Day

WASHINGTON, May 22.—(AP)—The United States today observed Maritime Day, marking the 125th anniversary of the sailing from Savannah, Ga., of the 100-foot sailing ship, the first ship to use steam propulsion on a trans-ocean voyage.

Laud City Sailors For Rescue Work

A NEWFOUNDLAND PORT, May 22.—(CP)—Two chief engine room artificers from Edmonton have been praised by officers here for their work while the corvette H.M.C.S. Gifford was rescuing 38 survivors from the torpedeed Canadian frigate William Borden.

They are Norman Easer, 3833 152 street, and William Bond, 7835 111 avenue.

Fraser supervised the throwing of scrambling nets over the side of the Gifford, and Easer saved many of the numbered, oil-belled swimmers by going down to the water's edge and grasping them long enough to be lifted aboard.

Bond was in charge of the engine room, and coaxed a record-breaking burst of speed from the corvette as she dashed across two miles of ocean to the stricken frigate.

Civil Servants Open Sessions At Coast City

VANCOUVER, May 22.—(CP)—A mass meeting Tuesday of all federal employees in the Vancouver area will highlight the 10th national convention of the Amalgamated Civil Servants of Canada which opened sessions here yesterday continuing through to May 28.

First two days of the convention will be confined to meeting of the annual executive to set up committees and draft resolutions for the general sessions, beginning Tuesday, which will be attended by 32 delegates from points across Canada.

Members of the national executive who met here yesterday included: George Lavers, of Regina, first vice-president; vice-presidents: J. O. R. Fiset of Quebec; A. H. Helm of Kitchener, Ont.; G. J. Dixon of Winnipeg; A. H. Payne of Edmonton; and James Graham of Vancouver and Fred Knowles of Ottawa, secretary-treasurer.

WHERE THE IMPOSSIBLE JUST TAKES A LITTLE LONGER

... and not very much longer, at that. In the brief span of four years, from September 1939 to September 1943, Canadians achieved an industrial expansion which normally would require a quarter century.

War set Canadian enterprise fantastic goals. Long since, these "impossible" objectives have been far surpassed.

To accomplish the astounding records, tremendous upheavals have taken place inside the factories. With startling speed they have shifted from civilian to wartime goods. A fountain pen company today makes shell primers. Ammunition boxes and fuses pour out of a sewing machine factory. Where silverware ruled the road, smoke bombs and shell clips are now star products. Electrical supplies have given place to gun mounts, trams and buses to aircraft and guns, locomotives to tanks.

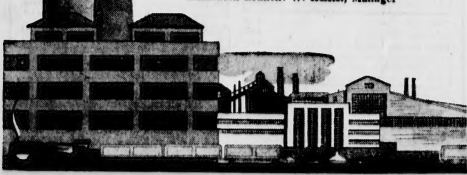

These things Canadian industry has done, is doing, and will continue to do until Victory is won. Impossible? Not for free enterprise!

In all this gigantic effort, The Bank of Toronto has repeatedly been called upon for friendly counsel, for essential loans and for expert guidance through the task of financing new equipment, swollen inventories and mounting payrolls.

In spite of difficulties and shortages, we have managed "on the job" to ensure your service requirements. We want to meet your needs when electric appliances are again available.

New Italo Flag

LONDON, May 22.—(CP)—The Vichy radio said yesterday Benito Mussolini has decreed a new flag for Italy. The broadcast said the deposed Duce had ordered the arms of the House of Savoy replaced by black eagle with open wings, perched on a bundle, against a background of green, white and red vertical stripes.

59 Executed

BERN, May 22.—(AP)—A Swiss Telegraphic Agency dispatch Sunday from Chino said the Germans had executed 59 Italians at Granoa May 18 in reprisal for the death of five Nazi soldiers in a torture bombing.

Child Drowns

HAMILTON, Ont., May 22.—(AP)—Jeanette Brown, 13-month-old daughter of Mr. and Mrs. Ambrose Brown, was drowned in a tub in the backyard of her home at 1001 Canfield on Saturday. She fell head-first into the tub.

Of Yugoslavia

Tito Urges Allies Accept Committee As Government

The Associated Press' interview by exchange of letters with Marshal Jugo Broz (Tito), which has been the subject of wide discussion since it was disclosed last week that it was held up by censorship of the Allied Mediterranean command, was approved yesterday for publication. An accompanying note said the original dispatch was intact except for passages referring to the location of wireless—EDITH.

By JOSEPH MORTON

BARI, Italy, April 30.—(Delayed by Censor)—(AP)—Marshal Jugo Broz (Tito) asserted today that the Yugoslav peoples and his national liberation army wanted not only material help from the Allies to carry on their struggle against the Germans but also recognition of the National Committee of Liberation as the government of Yugoslavia.

The marshal said the committee had not formally demanded such recognition by the United States, Britain and Russia, but that recognition would "strengthen the united struggle."

Tito asked that the Committee of Liberation be given the gold of the Yugoslav National Bank, the Yugoslav warships seized by the Italians and released by the Allies, and the Yugoslav medals and medals now in possession of King Peter's Yugoslav government in London, which his own organization does not recognize.

APPRECIATES SUPPORT

The marshal said his people were getting some help from the Allies and especially expressed appreciation of the support given his troops by the American Air Force. Much more is needed, however, he said, especially tanks, anti-tank guns, aircraft and food.

The Germans "helped by local traitors" have destroyed 17,000 of the entire Slav population of Yugoslavia," he declared, and have plundered with the aid of Croats, burning down villages and sheep, and destroying some towns entirely.

More than 110,000 soldiers of the national liberation army have been killed in the past three years, he said.

In reply to the question, "what is the strength of the enemy forces in Yugoslavia?" Marshal Tito included the Mihailovic Ghetniks among them and credited General Draza Mihailovic (war minister of the Yugoslav government in London and leader of its forces inside Yugoslavia) with having a force of only 10,000.

GERMAN DIVISIONS

His answer was: "In Yugoslavia there are still about 14 German divisions, four Bulgarian divisions, about 120,000 to 130,000 Croats, Dalmatians, Slovenians and Ustashi, about 15,000 followers of Field Marshal Milan Nedic, pro-Nazi former premier, 16,000."

Bomber Missing

VICTORIA, May 22.—(CP)—A Royal Air Force two-engine bomber which left its base near here last night on a training flight is missing and a search is being conducted in the Nevada island region, R.A.F. headquarters announced Saturday. A crew of three was aboard and next-of-kin have been notified.

Delay Hanging

Hanging of Sam Desjarlais, scheduled for May 31 at the Fort Saskatchewan jail, has been postponed until June 14, it was learned Monday. Desjarlais was convicted of murdering Karl Henningsen, Monday River trapper.

Former Screen Star To Enter Seminary

HOLLANDIA, Netherlands New Guinea, May 22.—(AP)—At Union hospital on the slopes of Puncu Hill they call him Leo—Dr. Somerset "Kiddie".

He's not the same jaunty Lew Ayres who once portrayed doctor roles in Hollywood films. As an assistant to a chaplain at this recently-invented beach he has his function is to talk with soldiers as they are brought to the hospital, sick or wounded, and ease their problems.

"I never intend to go back to pictures," Ayres told me. "I want to continue this work. God willing. It's taken war to give me understanding of men and to find myself."

TO ENTER SEMINARY

He plans to enter a seminary after the war and then go to a congregational pulpit.

Overseas

Wireless Operator Robert William Russell, R.C.M.V.R., son of Mr. and Mrs. H. Russell, 12728 118 street, who is serving overseas. He is 21 years old, went on active service in October, 1942, and took his wireless training in Toronto and Montreal. He attended the Cadet Public school, and for several years worked in the mail department of The Edmonton Bulletin.

Canuck Wing Batters Nazis In Day Raids

By LOUIS V. HUNTER

WITH A CANADIAN FLIGHTER WING IN BRITAIN, May 22.—(CP)—The R.A.F. 2nd Tactical Air Force with a Canadian Spitfire wing under Wing Commander, Lloyd V. Chadburn of Aurora, Ont., playing a prominent part, rained across the Netherlands, Belgium and France yesterday in a great softening-up of the enemy's rail transport which might have to bear the brunt of troop-carrying traffic when the invasion begins.

The British and Canadian fliers attacked this list of targets with excellent results.

Thirty-five military supply trains, 13 locomotives (five of which were seen to blow up), a large number of military lorries, staff cars, tugs, barges, flat-toppers and other military installations.

BATTER IS TRAINS

The Canadian attack in the area northwest of Paris, accounting for its trains as well as an assorted bag of lorries, army buses, staff cars, dispatch riders and other enemy personnel.

Again the Luftwaffe let the challenge in its skies go unheeded, the only enemy aircraft seen were on an airfield near Biechen and this was plastered with shelling.

Twenty planes were lost. Four of them Canadian, but the pilot of one fighter is known to be safe.

Three trains were damaged by F.O.B. G. A. Borlag of Guelph, Ont., and A. R. E. R. of Springfield, Ala., and a stationary train was attacked outside a station by a pair of Wood squadron pilots, F.O.B. John Gordon of Edmonton and F.O. Harry Boyle of Saskatoon.

Nazis Impressed By Canada's Navy

STOCKHOLM, May 22.—(CP)—

How greatly the Germans are impressed by the growth of the Royal Canadian Navy is revealed in an almost enthusiastic article by Dr. Arno Dohn, appearing in the "Berliner Botschafter" of May 18, entitled "astonishing progress of a navy."

Dohn says that a few years ago the words "Canadian navy" were greeted with "ironical laughter" in naval circles.

"When today Ottawa has nearly completed the shipbuilding space of 18,000 square metres, it must be considered as very remarkable," he writes. "This colossal shipyard means standing on feet of steel."

Dohn gives a number of figures regarding the present strength of the Canadian navy and wonders whether it wants to concentrate on light ships alone and follow up on defensive tactics.

"It is impossible to answer this question," he writes, "particularly in view of the steadily increasing influence of the air force on naval strategy... anyhow no matter how it is looked upon, the Canadian navy is being developed with swing and speed."

INDIANS, SCOTS CHEER CANUCK TANK FORCES

By DOUG HOW

WITH THE BRITISH 8TH ARMY IN ITALY, May 22.—(CP)—As Canadian tankmen lumbered through the dust Saturday, riding heavy Shermans that had done as much as anything else to pierce the German defenses in the Liri valley last week, Indian infantry stood by the road in platoon after platoon and cheered them on, and Scottish infantry jumped in situation and saluted as they rumbled past.

For hours and days the Canadians had fought together with the Indians and Scots as they fought, whether on the front line or in the rear, and they had rehearsed for weeks since.

At headquarters of the Indian division, staff officers lauded the Canadian armored formations, talked about the river-crossing May 12 that helped sway the Cassino battle and drove the first hard wedge into the Liri valley defenses, recalled that the division's general had insisted that Canadian form his support.

American bombers will be brought into action. We need not take it for granted that this would, automatically, give great aerial advantage. Judgment must wait until these enlarged bombers are put to the test of combat.

INCREASE PERFORMANCE

Increasing the size of aircraft does not in itself mean much, unless all other factors are right and in proportion. In other words, performance of the planes, and in particular their firepower (larger caliber and greater effective range) must be increased in line with the bigger. Otherwise, large planes may only prove to be misfits tactically, since a larger target is easier to hit when its defenses are not commensurate with its bulk.

We are fighting the decisive air battle over Germany now with weapons conceived by our strategic minds. Brought into combat against the enemy, they have resulted in a fairly definite ratio of losses, reflecting the qualitative and tactical relationship of the two contending air forces. Those ratios unquestionably could have been more favorable to us, but on the other hand they could have been far worse. But as long as we are about the loss-by-reason of our strategic numerical superiority—our ultimate victory is mathematically certain, unless Germany can spring a technological surprise of a radical nature, and on a large scale, and has in its arsenal, with Germany's rapidly shrinking tactical potential.

N. Zealand Paper Regrets Premier Not More Specific

AUCKLAND, N.Z., May 22.—(CP)—The New Zealand Herald, commenting editorially on the joint statement issued after the Commonwealth prime ministers' conference in London, said it was "unfortunate" that the "leaders of the British democracies could not have been more specific." It argued success of any policies adopted must depend on understanding and co-operation of the people of the Commonwealth.

The statement, issued Wednesday, urged a post-war organization to prevent aggression and violence and pledged continued Commonwealth unity.

"Unity" was reached on the principles of foreign policy but no hint was given what they are or how they will be applied," the Herald said.

"Hope" is the state motto of Rhode Island.

pledged continued Commonwealth unity.

Recover Body

KASKATON, May 22.—(CP)—

The body of Harold Iversen, 84, of Hamilton, Sask., was found in the South Saskatchewan river here yesterday. Police said it had been in the water less than 24 hours. An inquest has not as yet been decided on.

"My Boys' Smokes"

I GOT MYSELF A REAL WAR JOB!

Newspaper men are doing "two important war jobs," said President Roosevelt recently—"first in studying to prepare themselves for good citizens in tomorrow's world, and second, in serving as a vital link in the process of news gathering and reporting that makes our people the best informed people in the world."

Ask any carrier salesman about the profits and business experience that he earns while he learns on his route.

The Bulletin's SPORTS

by Hal Dean

YES, Sgt. Wayne Adams turned in a decidedly neat six-hit, no-walk job while sending his Yankees across on their right foot in the opener of the 1944 baseball campaign against U.S. Signals, the five-club circuit's new entry, at Renfrew Park on Sunday afternoon.

And fifteen strikeouts speak out rather loudly at any time, but when they are combined with a strike and single good for two runs batted in they make the going still tougher for the opposition.

Capt. Bob Sawyer was the only Signaller whom Adams didn't get to bite on strikes at least once and the easy-working right-hander was always able to keep down when necessary. In the second when Sawyer and Howell, both of whom were one down, Adams whiffed the next two batters.

DICK SPEER NOW UMPIRE

In the fifth season, after Byrd had opened with a drive and Ed Signaller followed with another, Adams struck out Laurel Garrett but then was helped out by a doubleplay after which Danahy's screw catch of Helmut Brown's shot fly.

This boy Brown was also good and he'll get along okay, even though four of the seven hits he yielded were for extra bases. Sawyer is a very capable ball player, but defensively he's a little shaky and Byrd got a brace of safeties in three trips. Signaller covered a lot of ground, having five putouts amongst the dandies in centre field and the playing.

Bob Coxford and Dick Speer.

Also Hits Two Homers

Milner Pitches No-Hitter To Shut Out Aircraft 9-0

PITCHING no-hit, no-run ball, allowing no walks and having a perfect day at the bat, including two home runs, was the accomplishment of Mike Milner, A.P. Officer pitcher, at Kingsway Park yesterday afternoon when his club shut out Aircraft Repair 9-0 in the opener. Centaurs defeated Moose 6-5 in the second game.

Milner's two homers, which came in the fourth and fifth innings, the second with one out, equalled a league record set in 1930, in each case he overhauled over the left field fence. In his other time at bat, he blasted out a double to centre field.

In addition, the star hurler struck out 12 of the 21 batters to face him. Wilbur Orr, and Tom Moore, A.P. Officers, were the only batters, including doubles to Frank Wrightfield, who made two and Fred Nidder, who made one.

In addition to Milner, Nidder, Clint Kelams, Wrightfield, Russell Blaisdell, Lloyd Sandoy and Don Cheneveth all brought in runs.

Following is the box score:

Aircraft Repair	AB	R	H	PO	A	E
Wrightfield, 3b	4	1	3	0	0	0

Cadets Mark Empire Youth Day With Parade, Drumhead Service

A striking parade of the city's sea, army and air cadets was witnessed by more than two thousand persons Sunday, when Edmonton units of the armed services, marched from the market square to the grounds of the Legislative Building, where they took part in a Drumhead service with Ft-Lt. W. G. Greenfield, chaplain of No. 4 I.T.S., delivering a special address, in observance of Empire Youth Day. Nearly a thousand cadets took part in the parade.

The Sea Cadets were headed by Lt. Cmdr. A. C. Emory, commanding officer of R.C.S. Warrior, and the band was directed by Lt. H. Courtney. Maj. E. Clarke, chief instructor for 2nd (Reserve) Battalion, The Royal Edmonton Regiment, headed the Army Cadets; the band being led by Capt. St. J. D. Parnham. Ft-Lt. Cyril Cornick, commanding officer of No. 12 Edmonton Squadron, headed the Air Cadets, with the band led by P.O. J. Wilson.

BAND SELECTIONS
While the cadets were marching through the city to the Legislative Building, the No. 4 I.T.S. band played a number of selections for the benefit of the people gathered on the grounds.

The cadets marched on the grounds and formed three sides of a square, with the platform and No. 4 I.T.S. band making the complete square.

After the "stacking of the drums," the ceremony began with the congregation singing the hymn, "All People That On Earth Be Dwell." An invocation was given by Capt. Rev. Canon, C. F. A. Clough, Garrison chaplain. The Lord's prayer was then repeated by all present and the 23rd psalm read responsively. His Honor the Lieutenant-Governor of Alberta, J. C. Bowen, read the lesson.

The hymn, "Stand Up, Stand Up For Jesus," was then sung. A prayer

was said by the Rev. M. G. Turnbull of Knox United Church. Another hymn, "From Ocean To Ocean," was sung.

The text taken by Ft-Lt. W. G. Greenfield, for his address was, "With Heaven it is all one to save by many or by few."

GODS WILL KEYNOTE
In the introduction he said, "It is our great privilege as a part of the youth of this city, to gather in this place, on Empire Youth Sunday, and join in the worship of Almighty God. And as we review the events that have taken place and will take place around us in the days that lie ahead, it should be obvious to all that the keynote of our every action should be God's will."

Most of us are aware that we are standing on the threshold of a great adventure. We have listened with great attention for the order to march that is to come. When it does come it will bring with it great adventure, great opportunity, and great sacrifice, he said.

"This then," he said, "is the place where youth enters the picture. The processes of life are such that the tasks that face the world must of necessity be carried out by the youth of every country. You are the makers of the world of tomorrow. What a splendid—what a high opportunity—but also what an awful and solemn challenge. First to remind ourselves that the nation which is God-centred, need have no worry about the future."

BIBLE INSPIRATION
Ft-Lt. Greenfield then went on to explain how the Bible could guide and be an inspiration to everyone. He ended his address by saying, "Do the job with singleness of heart. We must give only the best to God and his cause."

The national anthem was sung and a blessing given. Thus ended the drumhead service.

The hymns were played by the No. 4 I.T.S. band by kind permission

PRIVATE BREGER ABROAD

After he captured 'em and marched 'em here, he discovered his gun was empty!"

of Wing Commander E. G. Macpherson, commanding officer. The No. 4 I.T.S. band played the march past. The salute was taken from the front steps of the Parliament Buildings by Lt-Gov. Bowen. Also with Lt-Gov. Bowen were Ald. P. G. Mitchell, Capt. Canon, C. F. A. Clough, Maj. Dacre, Sqdn-Lt. Henderson and Lt. Anderson.

Police Agree to Unusual Request

City police are not unaccustomed to people coming in and asking to be locked up, but it is seldom a person goes to the trouble of driving to the police station in a taxi. A customer arrived there about 1:30 p.m. Sunday, dismissed his taxi, asked to be locked up as he couldn't take care of himself. He was obliged.

\$28,800 in Bonds Sold by Student

Miss Eva Margaret Maitland, 18 years old, a student of Alberta College, and daughter of Mr. and Mrs. G. M. Maitland of St. Albert, is one of the leading rural Victory Loan salesmen in northern Alberta.

This is her third loan drive. In the first, she sold \$8,200; the second \$15,600, and the drive just closed she ran up a total sales of \$28,800.

This is a record in her proud of as Miss Maitland attends school until four p.m., then made her canvass well into the night. The National Youth Finance committee are very proud of her efforts.

Youth Briefs Submitted for Consideration

Emphasizing the need for more extensive academic, technical, industrial development and expansion and a more inclusive and uniform national social security program, first briefs of the Edmonton youth committee were presented Saturday morning at the public library lecture room to the Rev. George Tuttle, associate director of the Canadian Youth Commission.

Based on six weeks of study following a preliminary conference in March and representing work of the most of the youth groups in the city, the briefs covered the problems of work, opportunities, religion, recreation and citizenship.

Findings of the work opportunities brief recommended lowering of the retirement age to 60 and establishing a national, government-supervised superannuation plan with compulsory retirement for all employed persons reaching the age of 60, to take effect at the close of the war."

CURTAIL IMMIGRATION
It is also urged, the brief stated, that with the exception of a limited number of refugees, immigration be curtailed in the event of war, for a certain period until we solve our own employment difficulties.

"We as a delegation of representative religious youth groups of Edmonton realize that we feel so deeply and strongly enough about our respective faiths," the brief stated, "that we agree to a temporary suspension of that on no grounds are we prepared to compromise, but we do agree to a temporary suspension of the principles of the 'Four Great Religions of the World'."

Recommendations made by the brief included that religious cooperation between home and abroad be encouraged to provide education in the ethical and spiritual values to teach children to respect religious differences and to create better understanding between religious groups; and more religious church leadership.

RECREATION BRIEF

The brief on recreation recommended that a youth committee be set up in Edmonton which would serve as a clearing house for recreational activities organized by our city athletic groups, that is, elected and representative of all parts of the city.

It was also recommended that community leagues be encouraged to increase membership and to take a more active role in providing recreation programs for youth and that more home and school associations be organized.

Pointing out "That the schools are not adequately meeting the recreational needs of our youth," the brief recommended that schools be available for use evenings and Saturdays and if this were not possible, that downtown recreational facilities be provided.

The preliminary brief on citizenship was given as no final brief had been presented. In the brief, the youth committee favored and the setting up of a department in the government devoted exclusively to affairs and problems of youth, as well as an extension and revision of the educational system to include education in citizenship.

A brief on religion submitted by a group from the Latter Day Saint church, endorsing in general the principles of the brief submitted by the Edmonton Youth Committee, was also read.

Among those submitting briefs on behalf of their respective subject groups were: Neville Lindsay, Work Opportunities; Jack Fitzgerald, Religion; and Tom Davidson, Recreation.

As far as family relationships, the brief presented at the afternoon session emphasized the need for providing adequate training in family relationships and home management in the high schools and community organizations.

Four groups presenting their composite brief on education stressed the importance of establishing a system of education under the national government with a department of education set up in Ottawa and powers delegated to the federal, provincial and local administrations. They outlined suggestions for delegation of powers, giving the federal government powers of research, a national physical fitness program, a free religious education, compulsory French and English for all of Canada, adult education and modern school buildings.

Curriculum, textbooks and other phases were delegated to the provincial government and for Edmonton, they suggested such local measures as reforms in the relationship between the school board and student relations and co-operation between the schools and community organizations.

HOUSING ACT EXTENSION

Suggestions offered in the findings of the groups studying the problem of health urged the extension of the present Housing Act and the health insurance plan be carried on a world wide scale.

The health brief also recommended more health and sex education in the schools and that a complete premarital physical and mental examination, including a Wasserman test, be a prerequisite in obtaining a marriage license.

Majority and minority opinions expressed in the brief submitted on national policies covered all phases of internal and external relations. Generally, the group was in agreement on Canada participating in any program of international rehabilitation, opposed to putting up trade barriers against products which can be produced more cheaply outside of Canada; government ownership of the railways and freedom for foreign airlines to use Canadian facilities for servicing and repair plans flying across Canada provided they do not discharge or take on freight or passengers.

The brief recommended immediate admission of refugees, the establishment of a planned policy

six-hour working day with no drop in wages, development of wider employment fields in rural areas and at points where raw materials are available; and greater development of Western Canada's natural resources and industrial potentialities.

The brief also took into account the question of taxation, recommending higher taxation on upper income brackets and maintaining direct taxation on excess profits in industry.

Concluding with suggestions for a higher national minimum wage for like employment and one at the public library lecture room to the Rev. George Tuttle, associate director of the Canadian Youth Commission.

Based on six weeks of study following a preliminary conference in March and representing work of the most of the youth groups in the city, the briefs covered the problems of work, opportunities, religion, recreation and citizenship.

Findings of the work opportunities brief recommended lowering of the retirement age to 60 and establishing a national, government-supervised superannuation plan with compulsory retirement for all employed persons reaching the age of 60, to take effect at the close of the war."

Legion Members Now Total 1,829

Membership of the Canadian Legion, B.S.L., Edmonton branch has reached 1,829. It was announced at a general meeting held in the Memorial Hall Sunday afternoon.

There has been a total of 119 new members in the last month, including 25 re-instated members. Members consisted of 34 old veterans, 49 new members, and two members of the C.W.A.C. At the present time 19 applications are awaiting the presentation of discharge papers before being accepted.

Mexican \$10 Bill Passed in Store

Passing of a Mexican \$10-bill at a store on Friday night and a male companion, was reported to city police over the weekend.

According to a clerk in the store, the couple bought half a dozen oranges and tendered the bill in payment.

Police believe the same couple were responsible for attempted passing of a Mexican \$10 bill at another store. Investigations are being made.

Edmonton Youth Reported Missing

Milton Johnstone, 15 years old, of 1008 9th street, missing since Saturday afternoon had not been found last night according to city police, who had been called on to search for the boy. He was described as being of slim build, with black hair, and was wearing a dark red corded coat, dark blue pants and light top boots. Parents of the boy reportedly told police he would not be able to find his way home alone.

Police are searching for the boy of immigration and that Canadian citizenship be made compulsory within five years of such immigration. A minority opinion suggested that restrictions be placed on the admission of people who cannot be assimilated into our society.

CO-OPERATIVE SPIRIT

In discussing labor and management, the brief pointed out that while the proper machinery and technique play an important part in the solving of labor-management problems, the really essential ingredient is the mutual respect and confidence of the parties concerned and a thoroughgoing co-operative spirit."

Event Honors Retiring O.C. At Wetaskiwin

Officers of No. 131 C.I. (B) T.C. at Wetaskiwin were hosts at a dinner and dance at the mess hall, 40 new members, and two members of the C.W.A.C. At the present time 19 applications are awaiting the presentation of discharge papers before being accepted.

At the dinner, to which all officers were invited, and those formerly at the centre were invited, the retiring officer, W. H. Strickland, retiring officer commanding who left the post on Friday to return to his post at the University of Alberta.

At the dinner, to which all officers were invited, and those formerly at the centre were invited, the retiring officer, W. H. Strickland, retiring officer commanding who left the post on Friday to return to his post at the University of Alberta.

During a short address the retiring commandant told those present of his initial task of getting officers for the centre. There were, he said, only four of the original officers present at the dinner but all who had been chosen had been chosen for the centre. The task of officers appointed to basic training was to get the centre up and running as soon as possible. The task of officers appointed to basic training was to get the centre up and running as soon as possible.

When making the presentation, Capt. Dowling on behalf of the officers expressed the regret at Lt. Col. Strickland's departure and stated that in his leadership he had been an inspiration to all training personnel.

The person which followed Mrs. Strickland, eldest daughter of Col. Strickland, received with her father.

Out of town guests included Lt. Col. J. O. R. Evans, M.C., Currie Barracks, Edmonton; Mr. J. R. Carver, Calgary; Maj. R. J. Pringle, Calgary; Mr. F. G. Young, Calgary; and Mr. F. G. Young, Calgary.

Mrs. Davies, Mrs. D. Petrie, Mrs. Jack Turner, Mrs. E. Newton, Mrs. M. C. McCall, Mrs. T. Day, Mrs. L. L. Sheppard, Mrs. H. Ingram, Mrs. M. Doloy, Mrs. E. G. Gos, and Charles Petrie all of Edmonton.

Misses Walcott

Theft of her wallet from a coat pocket, Saturday morning, was reported by Misses Walcott of Florence Lane, 1641 9th street.

According to the police, Miss Lane was walking on 101st street when a man bumped into her. She did not notice the theft until she had walked some distance along the street, she said.

1923 THE Automotive Industry BEGAN TO EXPAND

By 1923 the automobile had passed from the luxury stage and was entering the era of rapid expansion and mass production. A great new industry had come into being.

The men who managed Canada's Nickel mines and plants were determined to build a greater Nickel industry. In the automobile, subject at that time to frequent breakdowns, they foresaw new markets for Canadian Nickel to replace the war demand which had ceased in 1918.

So the Canadian Nickel industry gave its full co-operation to automotive engineers who were pioneering the search for stronger, tougher, more dependable materials.

Cars became stronger, safer, more reliable, as Nickel alloys were used for vital parts. It was not many years before the automotive industry became the world's largest user of Canadian Nickel, and the output of Nickel exceeded its wartime peak.

Today Canadian Nickel is again devoted to war purposes and again the industry looks to the future with confidence. Plans are ready to develop and expand old and new peacetime markets, so that the Nickel industry may continue, through its own initiative and enterprise, to make still greater contributions to Canada's welfare.

Dogs Dropped By Parachute Provide Latest Method of Rescuing Fliers in Northland

Pack dogs are being dropped by parachute as the latest means of rescuing fliers forced down in the Far Northern wilds. It is old stuff to parachute supplies to airmen in distress but an innovation when a pair of pack dogs come tumbling out of the sky to lug these supplies on what is often a long, exhausting trek back toward base.

Director

Oliver C. McIntyre president and general manager, Capital City Box Co. Ltd., who was nominated a director by Rotary International at Saturday at Chicago to serve for the coming year. His nomination is tantamount to his election. In addition to his work on behalf of Rotary, in which he was district governor in 1937-38, he has taken an active part in Y.M.C.A. affairs and other community welfare organizations. He is a past president of the Edmonton Rotary club.

Huskies Trained in U.S. Army Northern Rescue Work

Left March, Lt. Leon Crane, of Philadelphia, Pa., Alaskan Wing flier, who had been given up as dead, returned to Ladd Field, Fairbanks, after winning an 84-day fight for survival close to the Arctic Circle. He bailed out of a disabled bomber, only member of the 5-man crew to come back alive.

The Crane incident served to hasten the pack dog trials, for the greatest emphasis is put on search and rescue by Brig. Gen. Dale V. Gaffney, commanding general of the Alaskan Wing, Air Transport Command, U.S. Army Air Forces. The training is centered at Fort Nelson, British Columbia, a Wing base.

Maj. Joseph F. Westover, a grey-haired, clear-eyed, smiling man, who commands the Canadian sector of the Wing search and rescue unit, directs the project. He lives at 902 Willow Road, Winnipeg, Illinois, and for nearly two years he has had a hand in all rescues of pilots who have come down in the cold, rugged terrain of Northwest Canada. He was a pilot for American Airlines for 11 years before re-joining the Army.

Maj. Westover and his search crews frequently found the downed plane they sought in a bare, uncharted bush, far from any trail or ground force could traverse. Unhindered, after laboriously hacking and chopping their way through dense timber and around jagged mountain peaks, they arrived too late.

Such experiences spurred him and Lt. David Irwin, of Grand Rapids, Mich., Arctic veteran on his staff, to investigate the feasibility of dropping pack dogs as well as warm clothing and emergency kits.

Irwin knows huskies. In 1934 he continued on Page Twenty

Music Festival Prizes Awarded Final Concert

His Honor Lt. Gov. J. C. Bowen presented prizes to winners in the 27th annual Alberta Musical Festival held during the last week in the city. The festival concluded with a grand concert in McDougall United church Saturday evening.

In making the presentations His Honor said Edmonton was extremely fortunate in having the festival yearly and that this year's event had been most successful.

The government house party included Mrs. Bowen and her daughter, Mrs. Francis Neale, Mrs. R. B. Wells and Maj. C. V. Dacre.

McDougall church was crowded for the concert, which included in its program the winners in each class of the festival competition.

Prizes and winners were as follows: The Belyaev cup, All Saints Cathedral choir, the Sharpe trophy, Kathleen Busby; the Calgary City Club cup, the Chorus Singers, Lethbridge; the Patrick shield, Lorraine Buehler; Edmonton Musical Association shield (A), Margaret Ann Brine; the Matthews shield (B), Doreen Stanton; the Saatchy cup, Bernice McElroy; Calgary Women's Musical Club scholarship, Beverly Fielding; Calgary Women's Club "Gallie" Carey scholarship, Edward Link; Calgary-Superior Broadcasting Company scholarship, Bernice McElroy; the Taylor and Pearson Broadcasting Company scholarship, Lorraine Buehler.

The Edmonton branch of the A.M.P. vocal scholarship, Ruth Curless; Edmonton branch of the A.M.P. instrumental scholarship, Margaret Ann Brine; Women's Musical Club of Edmonton scholarship, Doreen Stanton; the Fred M. G. scholarship, Betty Hagen.

Sir Ernest MacKenzie, Toronto, and Sir Pinar, Vancouver, left Saturday evening for their homes after adjudicating the festival.

Trespasser Caught At U.S. Air Base

Seen as he climbed over a fence at the U.S. Army Air Base here Saturday afternoon, a man, giving his name as Bill Shulnick, 38 years old, a Ukrainian by birth, was taken into custody and later handed over to city police by American authorities.

According to police, Shulnick, when asked about his actions, replied that he had wanted to go to "what sort of work is being done." He came to Edmonton recently from Lethbridge.

Charged with failing to carry his national registration certificate, Shulnick pleaded guilty when he appeared before Magistrate A. J. K.C. in city police court Monday morning.

He had a registration card, the accused reportedly told police, but that was at his home. Asked by the magistrate where he lived, the accused did not know. The case was adjourned for further investigation.

The Inquiring Reporter

THE QUESTION
 The raising of carrots to sharpen the vision in "vegetarianism" by a college professor, Will, vegetarians and others, what have you to say now?

THE ANSWERS
A. A. HARRIS, assistant: I like all vegetables to a degree, but I cannot call myself a vegetarian. I recall, as a youngster, the joy that came from pulling up and munching on a carrot. But I have been wearing "spec" for years.

DONALD JOHN, pupil: I was never told that carrots would help my eyes, but I guess even that would not have made me like them any better if I cooked. I like raw carrots and will eat them any time.

ARTHUR FRANKLIN, commercial artist: I understand that stramen has been used for centuries in this way, to enable them to increase their vision during night operations. Not having met any of them, however, I'm unable to say what the users think of the carrots' powers. I knew one over 70 years of age, whose nose was in a paint factory consisted of two chunks of dry bread, a bowl of tea and several huge carrots. He was still going strong when last I saw him.

IMPORTANT NOTICE

To Residents of British Columbia Peace River District

Beginning Midnight, May 17th, until further notice, the British Columbia area, east of the Rocky Mountains, is closed under Section 119 of the Forest Act by Order of the Minister of Lands. All lighting of fires for any purpose, including camping and land clearing, and all operations including logging, sawmilling or other like operations, are prohibited without Forest Branch permit.

R. D. GREGG, District Forester.

Cyclist Injured In Truck Mishap

Leslie Clark, 18-year-old cyclist of 6 Great Ravine, taken to General hospital shortly after 11 a.m. Saturday, was found to have received bruises and abrasions to his face, his right elbow and hip, as the result of an accident with a truck at 106 street and Jasper avenue.

Driver of the truck was said by city police to have been Horace Bennett, 1238-122 street.

According to a police report, Bennett was slowly crossing Jasper avenue when he saw the youth pedalling rapidly while looking in another direction. Not sounding his horn, the truck driver attempted to avoid a collision, but he stopped when he saw a car on the truck as it hit the boy.

The boy was picked up from the pavement, where he lay, bleeding from the nose, and taken to hospital by passing motorists. He was not detained at hospital for treatment.

Calgarian Winner University Prize

Winner of the Monica Jones Anisodt prize for top standing in classics and English 30 at the University of Alberta, awarded at the close of the term which ended with convocation, was Miss Anne Helen Montgomery of Calgary, according to an announcement made Monday.

Her name was not included, through inadvertence, in the list issued by university authorities.

Miss Bernice Elvira Thompson, of this city, won second prize.

Car Missing

A 1936 coupe, owned by Anthony Mock, 23 Arlington apartments, was stolen from the front of the premises last Saturday night. It is painted black with green stripes and is equipped with a rumble seat. It bears license No. 81-530.

Alert Constables Nab Shopbreakers

Steady eyes of two city patrolmen caught the movement of a person ducking behind a counter in Fields Pharmacy, 12608 Fort Road, at 4 a.m. Sunday. With the arrival of a patrol wagon, doors to the premises were guarded, and within a matter of minutes the men, giving their names as William Graff and Joseph Fugio, were under arrest and charged with shopbreaking.

A check by the owner revealed that \$7.25 in quarters had been taken from a cash register, while a further \$10.00 had been stolen. The sum of \$35 was said by police to have been found on one of the arrested men when he was searched at police headquarters.

Credit for observing the fleeting movement in the shadows of the store who was putting him on a train for St. Paul on Friday, city police were informed. The man was described as being five feet tall, of dark complexion, and wearing a brown windbreaker and dark gray pants.

Seek Youth

John Kobewski, 13 years old, of 7726 103rd street, escaped from the office of the child welfare department who was putting him on a train for St. Paul on Friday, city police were informed. The man was described as being five feet tall, of dark complexion, and wearing a brown windbreaker and dark gray pants.

U.S. Consul Here Going to Ottawa

Robert English, American consul here since last July, will leave shortly to join the staff of the American ambassador at Ottawa, it was announced Monday.

Succeeding John Randolph as consul representative in his city, Mr. English arrived here last July. "I have come to feel very much at home in Edmonton," he said, "and will find it hard to leave after having had such a pleasant time. The many evidences of wholehearted co-operation between Canadian and Americans, which have been a source of much gratification."

View-Consul Paul C. Seddum will be in charge of the American consulate until the arrival of Mr. English's successor.

Appointment of the new consul has not been announced.

Fire Does Minor Damage to Home

Fire which broke out Sunday morning on the second floor of a two-story dwelling owned by Mrs. John Miel, 12648 Fort road, and occupied by four families, caused only minor damage.

The blaze, said to have started from an overheated stove, kept confined to the second floor until it was extinguished. Damage resulted from smoke and water to the rest of the building. The building was insured.

Your Baby And Mine

By MYRTLE MEYER—LORED

Fears may spring up for trivial reasons but they will not grow and spread profusely unless the soil is rich.

It is hard to conceive of a healthy child, with a secure background of parental affection and protection, who would tremble for three weeks because of an accidental fright.

What else is amiss? Take it for granted that there will be some Mrs. N. R. says her three-year-old son was washing his hands at a faucet and due to a poor connection it made a noise.

"He hasn't been able to sleep at night by himself since, and his mind's so much but his nerves twitch and his muscles move every few minutes. I took him to a doctor and he gave me a sedative for him. This hasn't helped."

"I have to lie down with him when he takes a nap and at night. It is three weeks since this started. When it gets dark he grows moody and won't play, just sits and stares at me. He is normal in all other ways."

The unexpected noise was just a happenstance. Had he been normal in all other ways, he might have been frightened but your common-sense explanation of the noise would have erased the fear.

If you pampered and petted him and acted as if there were something to fear, naturally he continued to play up to it. It is an attitude which convinces a child his fears are to be taken seriously.

about the noisy faucet and a suggestion that he imitate it would have made his fear foolish.

It is possible that he has some diet deficiency. Lard is a fat which shows up in twitchy nerves. Probably, he has heard all kinds of frightening stories about war, about killing, about Daddies being taken away, and these fears have been expressed verbally. So he reacts strongly to whatever arouses a fear emotion.

His attitude towards the dark shows that he is being given an idea that darkness is dangerous. The fears are synonymous. For the time give him a light in his room but stop lying down with him. Play games with him.

Sing songs or gaze at the stars, and substitute for a fear of the dark a feeling of wonder and interest. It is a twin attack upon his diet and health routines and your own attitude of nonchalance toward his fears will do much to end them.

Our leader, "Commonplace Fears of Childhood," may be met by your reading a book stamped, self-addressed, envelope together with your remittance for it to Myrtle Meyer, Editor in care of this newspaper.

McCoys Health Service

The senses of taste and smell are alike in that they both respond to a stimulus of a chemical nature. In man, these two senses are closely related and it is difficult to find where the sense of smell leaves off and the sense of taste begins.

You will remember the last time you had a cold, you will remember that foods all tasted alike. This is due to a blunting of the sense of smell in the nose, because of the inflammation of the mucous membrane lining that organ, which inflammation is present during a cold.

In man, the sense of smell is very important—we enjoy this sense when we enjoy the fragrance of perfume or when we enjoy the smell of food but we do not depend as much on the smelling sense in the same way that a dog depends on it. Some of the joys of life are laid upon the sense of smell in searching for a mate, in picking out an enemy, and in guiding them to food. For example, the bee finds the honey-bearing flowers chiefly through scent and, in the bee, the feelers are the olfactory organ, or smelling organ. Grasshoppers on their smelling with certain parts of their mouth which parts would naturally come in close contact with food as they crawl over it.

In human beings, the sense of smell is located in the upper part of the nose. This part of the nose chamber is lined with mucous membrane and in each chamber of the upper nose you have a patch about one inch square which is the part with which you smell. The olfactory cells are located on the outer surface of the mucous membrane and from each smelling cell, come out very delicate filaments, or fine threads. These are called "olfactory hairs" and are so delicate that they easily float on the surface of the mucus secreted by the olfactory hairs. The chemical particles which are breathed in with the air, and which carry the odor, come to rest on these very fine hairs and the resulting chemical stimulus is carried by a special nerve, back to the correct center in the brain. In the lower part of the nose, we do the breathing while the smelling takes place in the upper part—this is the reason that when we want to smell something, we sniff. When we breathe we carry the odor up into the smelling area. Without the sense of smell, we would lose much of the joy of food and the art of perfume making would disappear.

The sense of taste concerns itself principally with the taste of food and since food, upon first entering the body, is taken into the mouth, we would logically expect that this sense would be located in the mouth, which is true, most of the tasting being done by the tongue. We taste chemicals in solution and here we are able to perceive a taste, we must have the presence of a taste organ, which in man is composed of the taste buds of the tongue, the presence of a nerve over which the taste buds are connected to the brain center where that taste is recognized. The flavor which is tasted must be carried in solution, which solution must be neither too hot nor too cold.

The tongue is covered with mucous membrane and this membrane has a specialized kind of cell which is termed into the taste buds.

DOROTHY DIX SAYS—

Reading Is Faithful Cure for Boredom

Long, Dull Evenings of Soldier's Wife, Soldier's Fiances, Will Pass in Flash With Good Books at Hand

DEAR MISS DIX: My husband is in the service and overseas. I have one child 3 years old. I get along very well through the day, but when night comes I am so bored and lonesome I nearly die. My mother keeps the baby three nights a week while I go to the movies and with my friends, but my problem is not to do with the other four evenings, when I am at home by myself.

I don't like to read and I hate all kinds of needle work, and I get the jitters when I try to play games by myself. So please advise me how to pass the time away until this terrible war is over.

ANSWER: The one infallible cure for lonesomeness and boredom is a love of reading. If you will make your long, dull evenings pass like a flash, you will have about the most entertaining and amusing time. To my mind a picture stage is the proper place for a demonstration of affection. My great interest is in the service of the country.

ARM TROUBLE DEAR MISS DIX: How can you tell a boy not to put his arm around you in the show without offending him? To my mind a picture stage is the proper place for a demonstration of affection. My great interest is in the service of the country.

ANSWER: Right you are. Nothing makes a couple look so good and common as to spoon in public. Everybody is enjoying them, and naturally no girl wants to furnish amusement for the crowd. I don't want to make a picture stage of your petting parties while all can see and they are unromantic, or else they are trying to show off and they are not. But, at any rate, you don't have to stand for it. If they want to take a few hints about your not wanting to make a picture stage of yourself, you can fall back on the old excuse: "I'm not in the mood, the hat pin. A good job in the arm will make any amorous youth remove his arm promptly and look it to himself."

Vary Your Linens By ALICE BROOKS

DEAR MISS DIX: I am a housewife and having no children I am engaged in many social activities. I like to have the car always so that I can join my friends whenever anything comes to go. But my husband is very unreasonable.

have only four ways of perceiving taste, that is, you taste bitter, sweet, acid and salt. You taste sweet things at the tip of the tongue, and the sides of the tongue. If you keep on tasting some particular substance long enough, you will not taste it as keenly as at first, as the taste buds will become fatigued.

Eleanor Roosevelt

By ANN ADAMS

PITTSBURGH, Pa. Last evening I went to Freedom House to speak at the opening of an exhibit which shows photographs and documents, information collected by the underground information center functioning under the American Labor Archives and Research Institute, Inc.

Here we see what labor and social conditions are like in Europe today. This is an attempt to show the force of passive and aggressive resistance to the invader by European underground organizations, and the role of the laborer who is now in exile in other countries.

This exhibition should be of great interest to us in this country for it will serve as a valuable source of information to those who attempt to restore free government in the conquered countries after the war.

It has been obvious for a long time that labor needs a research institute, but in order to do research, one must first gather material. This is now being done, and the function of the Labor Archives and Research Institute is first to collect, preserve and make available the historical records of the labor movement; second, to promote research studies that will be useful to labor and civic bodies.

This institute should help to give the public a better understanding of the labor movement, and its labor and management. If the institute uses impartial, scientific research methods and people who are trusted to make objective and comprehensive studies on any question presented to them, I think this may prove a great factor in bringing about better understanding between capital and labor, and a more informed public opinion on controversial questions. Here is one activity in which the American Federation of Labor and the Congress of Industrial Organizations are joining together.

ANSWER: Right you are. Nothing makes a couple look so good and common as to spoon in public. Everybody is enjoying them, and naturally no girl wants to furnish amusement for the crowd. I don't want to make a picture stage of your petting parties while all can see and they are unromantic, or else they are trying to show off and they are not. But, at any rate, you don't have to stand for it. If they want to take a few hints about your not wanting to make a picture stage of yourself, you can fall back on the old excuse: "I'm not in the mood, the hat pin. A good job in the arm will make any amorous youth remove his arm promptly and look it to himself."

ARM TROUBLE DEAR MISS DIX: How can you tell a boy not to put his arm around you in the show without offending him? To my mind a picture stage is the proper place for a demonstration of affection. My great interest is in the service of the country.

Italian Patriots Told to Stand By Ready to Strike

By ELEANOR PACKARD

NAPLES, May 22—Italian patriots throughout Germany-occupied Italy were told by Allied and Italian leaders Sunday to stand by for orders for a general uprising and to keep in touch with "foreign elements" in the German zone so that they will be able to desert and go into action when they are told of the moment to strike.

Gen. Sir Harold R. L. G. Alexander, Allied commander in Italy, and the Italian high command jointly issued a communique which was broadcast to all patriots, telling them that German-occupied Italy has been divided into six operational zones for Italian patriots.

Composer Dies ROCKVILLE CENTRE, N.Y. (AP)—Vincent Rose, 63, composer of the popular song "Whispering," "Linger Awhile," and "The Girl on the Corner," died Sunday. Rose, who came to the United States from Italy in 1907, wrote music for more than 100 songs.

Damage Destroyer LONDON, May 22—(CP)—R.A.F. Bombers attacked a group of German warships in the Bay of Biscay, severely damaged a destroyer, left a minesweeper blazing and damaged another, the air ministry announced Sunday.

Research engineers of the Westinghouse electric laboratories say that many ideas about lightning are groundless. For example, they say that the fear of carrying an umbrella in a thunderstorm is useless as the hazard is negligible.

A good job in the arm will make any amorous youth remove his arm promptly and look it to himself."

ARM TROUBLE DEAR MISS DIX: How can you tell a boy not to put his arm around you in the show without offending him? To my mind a picture stage is the proper place for a demonstration of affection. My great interest is in the service of the country.

ANSWER: Right you are. Nothing makes a couple look so good and common as to spoon in public. Everybody is enjoying them, and naturally no girl wants to furnish amusement for the crowd. I don't want to make a picture stage of your petting parties while all can see and they are unromantic, or else they are trying to show off and they are not. But, at any rate, you don't have to stand for it. If they want to take a few hints about your not wanting to make a picture stage of yourself, you can fall back on the old excuse: "I'm not in the mood, the hat pin. A good job in the arm will make any amorous youth remove his arm promptly and look it to himself."

Government "Metal Medicos" Cure Wartime Ills

Mines Dept. Labs Iron Out Metallurgy Kinks With The Latest Methods of Research

When Canada undertook the manufacture of tanks in 1940 our industrialists ran into a problem that could easily have bogged down production. The tanks of these ponderous machines kept breaking after 300 miles or less of running. The Physical Metallurgy Research Laboratories of the Bureau of Mines were called in to help. The mileage of our tanks was increased to more than 5,000.

This instance is only one of the many which have made the operations of this important government research branch one of the great untold stories of the war. For more than three years these "metal doctors" have been helping to iron out a multitude of wrinkles which the naturally accompanied Canadian's rapidly expanding industrial war effort. Today, installed in a new set of laboratories considered to be one of the finest on the North American continent, they are prepared to carry on into peacetime the activities that have helped put Canada in the forefront as a producer of high quality war equipment.

PLENTY OF HEADACHES

The Canadian industrial war effort that started the world's war was accomplished without plenty of headaches. When Canadian manufacturers large and small took on the job of producing precision-built war weapons, they did so with little or no experience in this highly exacting field. Today we are making ships, guns, tanks, planes, shells and war equipment of all kinds. Almost every piece of equipment had its special metallurgical problem. In a war of steel against steel, the "metal doctors" of the Bureau of Mines played an indispensable part.

In the big, bright building on Booth avenue where these engineers are now carrying out their constant tests and experiments, there are scores of projects going on for the purpose of improving the war equipment of Canadian fighting men and their allies. Many of them, of course, will have to remain secret until after the war.

In the early days they often had to make their own equipment for carrying out special experiments. They still do, in fact, whenever war shortages threaten to delay something needed in a hurry. One instance of spectacular results being obtained with home-made equipment was the work on aircraft control cables. Before the Bureau's laboratories met, something about the cables of our airplanes had to be changed every 10 hours of flight. The engineers built a fatigue testing machine. Using this equipment, they developed a control cable that was good for several hundred hours of flight.

When Japan's entry into the war cut off our supply of tungsten, obtained from China and vital to the production of high-quality tools, the Bureau came to the rescue in a dramatic way. No large deposits of tungsten had been discovered in Canada at that time but small bits frequently cropped up with the ore in gold mines. Gathering these fragments from mines all across Canada, the Bureau engineers melted the ore in their own small refinery and managed to keep a sufficient amount of tungsten flowing to the manufacturers to tide them over the crisis. Since then, quite large deposits have been found and the danger is over.

In such ways have the "metal doctors" worked quietly behind the scenes, never hesitating to push aside their microscopes and turn up their shirt sleeves to follow some particular experiment right in the industrial laboratories where tests are carried out under actual factory conditions.

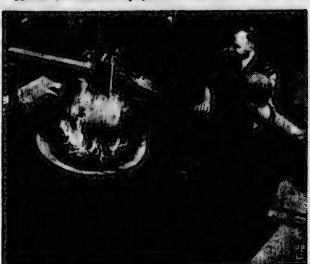

New, established in their new

In metallurgical research labs of the Bureau of Mines Scientists try their skill against nature's riddles. In photo above gas content of metal is computed.

George Ensel is one of few Canadian glass-blowers specializing in scientific equipment. At Bureau of Mines he fashions equipment for Government labs.

Metal aircraft fittings are removed from heating furnace and dipped in oil bath. Treatment increases life-span of metal, is vital wartime contribution.

Priority For New Hospital Now Probable

It has been indicated by the Dominion government that approval will be given to Alberta's application for priorities to build a \$500,000 tuberculosis sanatorium in Edmonton, Hon. Dr. W. W. Cross, minister of health, said Monday.

Dr. Cross returned from Ottawa last week, where he discussed the TB hospital question with Dominion officials. As the eastern provinces, officials asked for information concerning certain details of the new hospital, indicating that when this was furnished, the priorities would be forthcoming.

The information asked for is to be given immediately, Dr. Cross said.

It is planned to have the basement of the hospital completed this year, so that the structure proper may be completed in 1945.

The auditorium will house 200 patients, and will be paid for out of the province's \$20,000,000 war reconstruction fund. It will be located on the University of Alberta power plant, extensions to which have been announced already.

The province applied for priorities to build the TB hospital last year, but they were refused because of a shortage of steel for reinforcing purposes. The shortage has eased somewhat, and it is now possible to release the required material.

In supreme court Monday a decree absolute of divorce was granted by Mr. Justice C. C. McLaughlin to Alfons R. Jesette from Eva Jesette.

laboratories, they are looking forward to playing an equally important part in the industrial production that is expected to hold Canada's place in the sun after the war is over.

Polish Editor Will Speak Here

A. Moraki, editor of the Polish newspaper, Chronicle Weekly, will speak to the Polish citizens of Edmonton on Thursday at 8 p.m. in the St. Paul's hall, 118 avenue and 38 street. His topic will deal mainly with the further strengthening of the war effort by the Polish citizens in Canada against the Nazis and Fascists, and thus aiding the Polish people in their fight for their freedom. He will screen a film, showing the Polish force in action on the Eastern front against Hitler's military machine. Mr. Moraki is on tour now in Western Canada.

Road Building Crews Working In Northland

Road construction and repair crews are now at work on the Peace River and other northern highways, bringing these roads into first-class shape for the summer. It was stated Monday by Hon. W. A. Falloon, minister of public works, who returned over the week-end from a three-day trip through the north country.

On Highway No. 2, from Edmonton to the B.C. border, several crews are busy completing work on several links. An outfit is to be sent in to the stretch between McLean and Peace River, where the road is to be reconstructed and gravelled. Other work is to be done near Dunvegan, at the Peace River crossing.

"Quite a bit of work" is being undertaken near Spirit River, and from Grande Prairie west to the B.C. border," Mr. Falloon said.

WORK PROGRESSES

Work is progressing in the Canyon Creek, Kinuso and Jostad areas, and on Highway No. 34, between High Prairie and Grande Prairie, work has been finished from High Prairie half the way to Sturgeon Lake.

Reconditioning and graveling is also under way on Highway No. 35, north from Grimshaw to Nohewatin, and in addition, all kinds of work is being carried out on side roads.

In the course of his trip, Mr. Falloon visited High Prairie, Kinuso, Slave Lake, Grouard and other northern points.

Acting Ministers

During the absence at Victoria, B.C., of Hon. Solon E. Low, Hon. A. J. Cooke, provincial secretary, is acting minister of education, and Hon. Dr. W. W. Cross, minister of health and public welfare, is acting provincial treasurer. The acting portfolios were taken on in accordance with an established schedule which names substitute ministers to act in the absence of executive council members.

Mr. Low is convalescing at the coast, after a recent attack of bronchial pneumonia.

Re-Elected

KINGSTON, Ont., May 22.—(CP)—Hon. C. A. Dunning was re-elected unanimously as chancellor of Queen's University at a week-end council meeting. He has occupied the post since 1940.

GIRLS

Two girls, 15 and 16, were arrested by police in the city of Kingston, Ont., on charges of stealing a car.

The girls were taken to the city hall, where they were held overnight.

World News Highlights Presented in Picture Form

Maj.-Gen. Pearkes Reviews 2,000 Volunteers

More than 2,000 troops stationed at the training centre at Vernon, B.C., who joined the Active Forces within a period of three weeks were reviewed by Major General G. R. Pearkes, V.C., C.B., D.S.O., M.C., who is General Officer Commanding the Pacific Coast area, as they prepared to leave their training camp. The men gave the general three thunderous cheers fol-

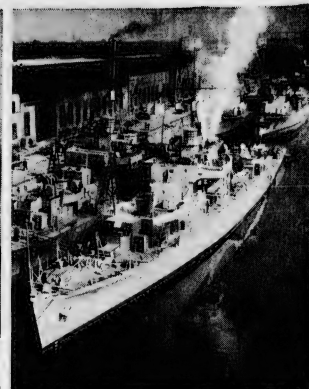

lowing the review and march past and a brief address in which Major General Pearkes complimented them on volunteering for Active Service. At top General Pearkes is pictured as he inspected the troops before wishing them Godspeed, stopping to talk to individuals in the ranks. The soldiers are shown below as they waved steel helmets in the air and cheered the General at the conclusion of his inspection.

Canada Builds Pocket Destroyers For Navy

Outstanding achievement in a field where Canadian skill and ingenuity have wrought wartime miracles has been the construction of frigates in Canadian shipyards. Here a brand-new ship goes through first trials.

At fitting dock, frigate receives last touches.

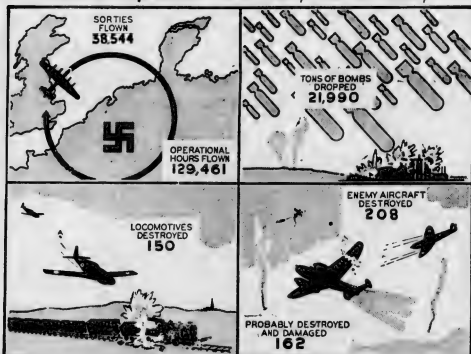

The frigate is one hundred feet longer than the corvette, is faster and more strongly engined, carries heavier armament. The average cost is nearly \$1,500,000. Deliveries for 1944 are scheduled at a rate close to one per week, with 44 to be delivered this year. Left, Marine fitter John Sinclair installs tachometer and right, Maurice Anderson cuts through steel plates.

R.C.A.F. Squadrons Take Heavy Toll of Enemy

Extent of the participation of Royal Canadian Air Force squadrons overseas in the war against the enemy during 1943 and up to the middle of February 1944 is illustrated here. These statistics cover the operations only of squadrons manned and maintained by the R.C.A.F. They do not take into account the contribution of the many

more thousands of R.C.A.F. personnel attached to R.A.F. units. A sortie (the total of which is shown upper left) is one operational flight by one aircraft. In addition to the destruction pictured here, R.C.A.F. squadrons also inflicted heavy damage on enemy U-boats, merchant vessels, tugs, barges, military installations, motor vehicles and transports of all kinds.

Grim "Road Blocks"

Bodies of dead Japs form grim "road blocks" littering the path of a detachment of "Merrill's Marauders", advancing through the jungle in Burma's Hukawng Valley. The Marauders are the first U.S. infantry troops to fight as a unit on the continent of Asia.

Ford Builds New Mobile Bofors

LONG a mainstay of British defences, the famous Bofors 40-millimeter gun is now revealed as a fast, mobile offensive weapon, in this picture just released by Ford Motor Company of Canada, Limited. The new wheeled unit, called the Self-Propelled Bofors, utilizes a special Ford 4-wheel drive chassis, and is powered by the Ford V-8 engine, combining ability to negotiate rough terrain in cross-country driving with a top speed of over 40 miles per hour. Hitherto on the secret list, the new mobile Bofors has for some time been produced at Windsor for the armed forces, who have found it invaluable in the protection of road

convoys against enemy aircraft and as an anti-tank weapon. The gun is automatic in operation, with power mechanism for elevating and traversing, and throws its two-pound shells to a height of 19,000 feet at the rate of 120 rounds per minute. Ford engineers cooperated with technical experts of the Department of Munitions and Supply, including the Army Engineering Design Branch, in working out the improved design features embodied in the new Self-Propelled Bofors, which is the latest of more than fifty different types of military vehicles produced by Ford of Canada.

Up to the Hilt in War Effort!

Doing their bit to boost Canada's war effort are these five New Toronto, Ont., sisters. They're all working in the C.N.R. locomotive shops, they're all married to active servicemen or essential war workers,

and they look after their families in their spare time. Left to right: Mrs. Margaret Finch, Mrs. F. Barrett, Mrs. Mabel Tremblay, Mrs. Katy Guyau, Mrs. Bella Rigby. Most of them have several children.

ADDRESSES ON THE MOVE...

THE TRIALS OF IMPROPERLY ADDRESSED MAIL

Home Building In City Is Ahead Of Last Year

Private construction of houses in Edmonton up to May 18 this year totals \$721,180 compared with \$538,815 in 1943, an increase of \$182,365, it was reported in a report that will be submitted to the city council Monday night by the city commissioners. This year permits for 305 homes have been issued, compared with 188 up to May 18, 1943.

The commissioners report also that 180 of the 250 homes being constructed by Wartime Housing Ltd. are now occupied, and that houses are being completed and turned over at the rate of eight or nine weekly. Forty basements have been taken out and the concrete work on the footings and basement walls is underway in the additional 100-house project. Other basements are being excavated each day.

RECEIVE RACE MEET

Council will be asked to consider an application from the Edmonton Exhibition Association to hold a ten-day race meeting here starting August 1. The directors of the association, at a meeting held Friday night, voted unanimously to request sanction from the city council to hold the meeting.

Recommendation is being made by the commissioners that the customary practice of cancelling the second regular monthly meeting of council and committees

"We're Just Like This"

Dwight Eisenhower, Allied invasion leader, for an Inglis. "We're just like that," the Philadelphia boy winks as he displays the shoulder badge received last week from the General, who said he wore it during the North African campaign.

"Just to show the other fellows," Leo O'Connor wrote to General.

during the summer months be followed.

Council will consider also an application from W. T. Henry to rebuild the Blouin Henry warehouse, recently damaged by fire. Mr.

Member First R.A.F. Squadron To Bomb Naples Returns Here

P.O. K. L. Killips, a member of the first R.A.F. squadron to bomb Naples, returned to the city Monday morning after almost three years overseas service.

The 21-year-old air gunner who flew with the R.A.F. through the whole of the North African campaign, said he was thrilled to get back to Canada "and see the bright lights again."

Reserved in manner, the young airman refused to comment on any of his experiences with the bomber command.

A son of Mr. and Mrs. A. Killips, he has three other brothers in the armed forces. P.O. Clifford Killips is stationed in Madagascar as a pilot in the transport command. Another brother, P.O. S. D. Killips, 2nd, is with the R.A.F. Ferry command. "Chir" had several trans-Atlantic flights before going to South Africa.

Sgt. Cecil Killips is stationed

with the R.C.A.F. at Vancouver, and LAC Lorne Killips is training as a wireless air gunner at Winnipeg.

COMPLETES TOUR

The returned airman enlisted in the R.C.A.F. in January of 1941 and went overseas in October of the same year. He went to the Middle East in June, 1942, and completed his tour of operational flights in that theatre.

Home for a month's leave, he said he wasn't sure what he'd be doing after that but in the meantime he is going to really enjoy himself.

Here's New Way To Select Hubby

NEW YORK, May 22.—(AP)—Girls have a new way of selecting civilian candidates for matrimony. One was overheard telling another: "A well-baked neck's

Edmonton Girls Train With C.W.A.C.

LILLIAN KAY ELLIOTT
Lillian Kay Elliott and Mary Adrienne Martin, both of Edmonton, were among the latest draft of members of the Canadian Women's Army Corps to leave for Kitchener, Ont., where they will take a five-week basic training course at No. 3 C.W.A.C. Basic Training Centre. Lillian is the daughter of Mr. and Mrs. John Elliott, 18 Connaught road. An office clerk in civilian life, she hopes to take a photography course in the army. Mary is the daughter of Mr. and Mrs. Edward De Meulenaere, 8523 9th avenue.

the thing to look for. That's where you get burrowed under a Victory garden. And with ration points the way they are, a good provider's what you want these days."

Planning Concerts Next Week-End

Culminating a year of intensive training and numerous engagements, Canada's largest school band will present two evenings of school music to Edmontonians at Westgate Auditorium Friday and Saturday, May 26 and 27, starting at 8:15 p.m.

The program consists of overtures, selections, marches and solo numbers and majorettes will give displays of single double and triple baton twirling. The presentation is in three parts: Senior section, comprising 55 members, the average age being 16; junior section, 85 boys whose average age is 13 and massed band of 150 boys.

Total membership with majorettes now stands at 180, largest in the history of the band.

The grand commander of the Scottish Rite Masons of Canada, Dr. Douglas G. McIlwraith, of Hamilton, accompanied by his wife, is making a tour of Canada. He will remain in Edmonton from Vernon, B.C. Thursday evening.

Accountants Hold Meeting in City

The Society of Industrial Accountants of Alberta held its first general meeting Saturday afternoon following a most luncheon in the Macdonald hotel.

The adoption of by-laws and the election of officers for the ensuing year being the major business discussed. The officers elected include J. A. Tupper, president; W. Nobbs of Calgary, first vice-president; F. D. Stollie, 2nd vice-president; and J. B. Whelan, secretary-treasurer. Other members of the council are W. B. Evans and A. E. McDonald of Edmonton, F. H. Ogden, J. W. Randall, W. L. McPherson and A. F. Bowler of Calgary.

The society was incorporated by a private bill at the last session of the legislature and received royal assent March 24. The general object of the society is to promote and increase the knowledge, skill and proficiency of its members in all things related to cost and industrial accounting, business organization and administration.

There are at present 25 members in the province.

Membership is open to any person engaged in or interested in its objects. Members passing the required examinations are granted the use of the designation "Registered Industrial Accountant" and the degree R.I.A. Arrangements for correspondence courses in accounting subjects are arranged for students through the University of Toronto. Members of the society are supplied the courses at half price.

The society is affiliated with similar bodies incorporated in the provinces of Ontario and Quebec. The incorporation of the society in other provinces in Canada is anticipated at an early date.

ECONOMICS for the HOME

Annual Income	£ 20
Annual Expenditure	£ 19 19s 6d.
Result	Happiness
Annual Income	£ 20
Annual Expenditure	£ 20 6d.
Result	Misery

Under wartime conditions living costs could rise so fast that your expenditures just couldn't be kept within your income. In order to aid the control of the family "outgo"—a ceiling is set on prices.

To make the ceiling stick, costs of production—including salaries and wages—are controlled

rationing helps fixed prices by seeing that need—not money—determines distribution

controls set the system; but public co-operation is what makes them work.

Every dime and every dollar saved

by buying wisely

by making things "do"

by resisting luxuries

by economizing in every way possible

and investing the savings in Victory Bonds

helps the individual's budget

and our common future.

IT'S NOT THE NUMBER OF DOLLARS YOU HAVE BUT WHAT YOUR DOLLARS CAN BUY... THAT COUNTS

Stability is our safeguard... inflation would be our ruin

MRS. CONSUMER WEEK
MAY 22nd to MAY 27th

Mrs. Consumer Week is planned to focus the attention of women from coast to coast on the important part they must continue to play in keeping Canada on a sane and stable basis. Mrs. Consumer—your protect your home now and in the future when you—

BUY WISELY

PAY NO MORE THAN CEILING PRICES

OBSERVE THE SPIRIT AS WELL AS THE RULES OF RATIONING

PAY YOUR TAXES PROMPTLY

SAVE AND INVEST IN VICTORY BONDS

PAY YOUR TAXES PROMPTLY

This advertisement is the first of a series being issued by the Government of Canada to emphasize the importance of preventing further increases in the cost of living now and deflation later.

...all each other peace rumors!"

Veterans' Guard To Celebrate Anniversary

Members of the Veterans' Guard of Canada will celebrate the fourth anniversary of the establishment of that corps on Wednesday.

In this connection, Hon. J. L. Flaherty, minister of national defence, has forwarded a special message which is to be brought to the attention of all ranks at special parades to be held in connection with unit celebrations on that anniversary.

The message reads as follows: "The Veterans' Guard of Canada was formed at the request of War Veterans of World War I, to give them the chance they asked for to serve in World War II."

"On May 24, the Veterans' Guard of Canada will celebrate its fourth anniversary. Today, the strength of this fine corps is approximately 11,000 all ranks. The readiness of the ranks of Mons, Ypres, Vimy, Passchendaele, Amiens, Cambrai, Valenciennes, to give again is abundantly understood. It came from the spirit of devotion to duty and the loyalty which burns just as steadily as ever in the hearts of that great company who had already in those earlier days put the old Canadian Corps high up on the roll of the world's fighting ascription."

"I sincerely wish for you and for them more power and great success."

Early Service In Obscurity "Y" Founding

In spite of threatening weather, more than 100 Y.M.C.A. members and friends gathered at the first relative building grounds Sunday for a special service to mark the observance of the Y.M.C.A. centennial.

In his address, Reg. Ross, Executive Secretary of the Edmonton Chamber of Commerce, and former secretary of the Y.M.C.A. stated that we must be prepared in the second century of the Y.M.C.A. to face the challenge of meeting the new phases of the chemical era as George Williams, president of the Y.M.C.A., met the problems arising from the industrial revolution in 1844.

Other features of Sunday services included special services devoted to Empire Youth Sunday.

At McLaughlin church, the Rev. Geo. M. Tuttle, associate director, Canadian Youth Commission, was presiding. At St. Anne's church, the Y.L.P. held a rally and installation of officers with the Rev. H. E. Spence, Associate Temperance Forces of Alberta, at First Baptist church.

The Rev. F. A. Peake, at All Saints' cathedral; the Rev. C. Hutchinson, Calgary, at St. James' Episcopal; the Rev. A. Walker, Lloydminster, at St. Andrew's Presbyterian church.

This week, beginning May 24, the Alberta Conference, United Church of Canada, will be in session at Metropolitan church.

Survivors Land RIO DE JANEIRO, May 22—(AP)—Delivered Brazilian 19 aircraft dispatched yesterday, the arrival in two lifelines of 45 survivors from a French ship torpedoed May 6 off the coast of South America.

Season Opens at Toronto Big Crowd Sees East Horses Score Wins in Plate Trial

TORONTO, May 22—(CP)—More than 25,000 fans Saturday watched the annual Henkel Memorial Plate Trial, Ontario, and Korafoord, from the Midway Stables at London, Ont., divide laurels in the first running of the Plate Trial, exclusively for candidates in the 80th running of the King's Plate next Saturday.

Because of the large entry in the race, held on the 20th day of the 1944 horse racing season at Toronto's Woodbine Park, it was split in two. It was the first time in many years that the King's Plate was not down for decision on the first day.

Junior Red Cross Members Tag on Annual Primrose Day

Members of the Junior Red Cross Society held their annual Primrose Day Saturday when they sold primroses for the benefit of society funds. The young girl in the immediate foreground is Judy Schugerman, whose father, Sgt. Jack Schugerman, is serving overseas with the 92nd Battery, Royal Canadian Artillery.

Reserve Army Notes Seven Are Successful In Passing Armorer's Tests

Seven members of the Support Group No. 1 (R) Armored Division Ordnance Workshop at Ponoka were successful in passing armorer's tests following a recent school held there. Sgt. Don Sweet headed the class with 85 marks followed by Pte. Fernin, Webber, Drummond, E. C. Courtney, Phelan and L. R. Courtney.

Range firing exercises for Workshop unit members will be held at Ponoka May 27-28. A Winterburn range, arrangements being made to fire three and sub-machine carbines. To round out the weekend an overnight camp will be held with a series of about tactical schemes conducted in the area.

2nd (R) BN, EDMONTON TROOPERS. Enrie Jackson, recent C.M.S. of "A" Coy, visited the Victoria Armored Division Ordnance Workshop at Ponoka. He was shown with attention and many invitations to come. Mr. Jackson is unfortunately a victim of circumstances and is unable to return to the unit.

Everybody in "A" Coy, joined in greeting their old friends. Pte. J. Lammie and Pte. M. Field, now found it possible to turn out on parade. Pte. Lammie finds time to do a little job with the Army, but likes his training with the Victoria Armored Division Ordnance Workshop at Ponoka. Pte. Field works a farm with his father at Horse Hills but is making a definite effort to attend all parades.

4TH CASUALTY CLEARING STATION AND CEMETERY HYGIENE SECTION. Training in these two units is being carried out with a view to going to the range early in June.

On Friday, May 22, a demonstration of the Ben gun was given by the range early in June. The instruction in loading and unloading the rifle was detailed.

On Sunday, May 22, two units went out in the country for some practice. The Hygiene section was given the opportunity to put into practice some of the instructions given during the past few months.

61ST (R) FIELD BATTERY, R.C.A. Following Wednesday evening's drill period, Capt. George Hill, of the 61st Field Battery, R.C.A., gave a most interesting lecture on the subject of fire discipline. This is the organized method by means of which the fire of the battery is ordered and controlled from the observing officer's position forward.

On Friday, May 22, the 61st Field Battery, R.C.A., was in the town area in order to demonstrate to the citizens of Edmonton that a Reserve Army artillery unit is organized here, and to bring in their attention the fact that they are the first in the area.

From Mr. R. E. Webster's Stable at Millland, Ont., set the pace through the race, and ended in third place behind Acera, from the Toronto Stable, and H. C. Hines. The winner paid \$10.45 for a \$2.10 ticket.

Acera, a 3-year-old gelding, from start to finish, was come from behind after the half way mark, and a brilliant stretch drive won half a length over the pace-setter, Hines, who was followed by Acera, finished by the show position. There were seven in this event. Hines covered the distance in 1:12.55 and paid \$2.10 for a straight ticket.

"They sell this place every few minutes!"

Annual Meeting First Baptist Hears Reports

The annual business meeting of First Baptist Church, May 17, was in many respects the most encouraging in the church's history. The minister, the Rev. Daniel Young presided and all reports showed genuine interest and progress.

The war services committee reported the almost 100 men and women of the congregation who have been helped by sending letters, reading and parcels, while the Red Cross workers have been active in sending bundles for Britain and other enterprises.

The church clerk reported a membership of 846 with 28 new members received during the past year. Total receipts were approximately \$11,500 of which \$1,800 was given to missionary enterprises. In addition it was reported a contract had been signed for immediate construction of the North Edmonton location building at a cost of \$6,500.

Officers elected: deacons, A. J. Cook, J. H. Pavey, R. Westgate, G. A. Wignome; finance committee, E. W. McKinnon, J. H. Pavey, A. Woollard, L. L. Culler; treasurer, R. C. Sheldon; altar, M. C. McCann.

Canadian Legion Will Again Urge Soldier's Return

Edmonton branch of the Canadian Legion, B.E.S.L., will press for action taken by the Department of National Defence in connection with the return on compassionate grounds of a soldier serving in Italy. A request made by the branch that the man be returned for service in Canada was refused, it was announced by W. J. Williams at a general meeting of the Edmonton branch Tuesday afternoon in Memorial.

The soldier in question is one of three sons of a couple living in Edmonton. Two of the boys have been reported missing, one presumed killed, and the father has requested that the third man be transferred to non-combatant duty. The Canadian Legion officials have been making the matter requesting his transfer to Canada on the grounds that his parents were not in good health.

REQUEST REFUSED. In reply to this request the department of National Defence notified Mr. Williams that while both parents were unwell, medical conditions, and that since three daughters are at home with the parents the man could not be returned on compassionate grounds.

John Turner, secretary of the Legion, said he had written the "11 medical examinations" in connection with the military call-up. He said that it was possible for men called up by the National Mobilization Board to have their own doctors give them a medical examination and determine their category. He stated that he felt every person receiving a draft notice should be subject to military medical board examination.

A discussion of the housing situation revealed that Legion officials are satisfied that the city is doing everything possible to solve the problem. Mr. Williams stated that he has talked with several city officials and has been assured that a number of alternative plans are pending the return of Mayor John Fry from eastern Canada.

PROVIDE LEGAL AID. Mr. Williams also told the meeting that the Alberta Law Society is doing everything possible to aid service men and their families in providing lawyers to represent those receiving orders to appear in court in connection with election actions.

The sale of city lots for speculation purposes was denounced by a number of Legion members. It was stated that the city should not sell to people who did not intend to build on them.

"Our boys will be returning from the front," he said, "and many of them will want to build their own homes. They'll either have to pay high prices for the decent lots held by these speculators, or they'll build on the outskirts of the city."

The matter was referred to Aldermen C. E. Griegory, R.C., and B. Snows for further investigation and discussion with city officials.

ANSWERS COMPLAINT. Answering a complaint about the formation of a South Side post of the Edmonton branch of the Legion, president H. E. Tanner stated that the branch of the Legion would be happy to see units set up in other districts of the city, as it would mean increased membership and greater strength for the Canadian Legion.

"Maggie" and "Jiggs" have pleased the war by their fellow K-9's. When a plane cannot land near a disabled aircraft, or it's too far to push in, dogs will be dropped. Search and Rescue's purpose is to get the victim out as soon as possible.

UNCLASP CHUTE. Capt. Wm. R. Jacobs of Lewiston, Idaho, Wing Flight Surgeon, has hailed out of the same ship with "Maggie" and "Jiggs" and as soon as he touched ground, unclasp his chute and the dog of the pilot got out his first aid kit, and prepared to go to work. Capt. Jacobs said flight surgeons can carry 20 to 40 pounds of medical equipment in said flight surgeons on a compact, standard crash kit which all flight surgeons who jump to a rescue, can carry.

Train Huskies In Rescue Work For Northland

Continued from Page Eleven

A made a 2,000-mile trip along with his dog team across the frozen tundra to Akavik to Baker Lake region.

The soldier in question is one of three sons of a couple living in Edmonton. Two of the boys have been reported missing, one presumed killed, and the father has requested that the third man be transferred to non-combatant duty.

Each tips the scale at 100 pounds. Because their wolf ancestry outstrips the strain of native dog, "Jiggs" and "Maggie" constantly quarrelled and wrangled with their canine comrades. Lt. Irwin felt that if any of his charges were expendable, it was this pair.

So it fell to them to make the first jump. There were many questions. Could the dogs bale out safely? Would they break their legs on impact? Obviously, an inexperienced dog was no good to a stranded flier.

A five-pound canvas harness, lined with sheepskin, was rigged over each dog's back and buckled across his chest and beneath his belly. It was decided that the two dogs could be dropped simultaneously with a 26-foot cargo chute.

"Jiggs" and "Maggie," a Siberian and probably the only blue-eyed dog in Canada's Northwest, were barked barkers, used to the side of a Norwegian plane. At first they tried to get at each other's heads but once their harnesses were attached to a single chute, they seemed to sense they were in the thing together.

BITTER ENEMIES. The two fliers, as they lay down side by side, kept for the first time. With the door of the plane removed, they were hoisted aboard. Their "Maggie" and "Jiggs" were the last to be hoisted. They sat the static line that would automatically release their chute was properly adjusted.

Then the Norwegian took off. At 1,300 feet, "Jiggs" and "Maggie" were barked barkers, used to the side of a Norwegian plane. At first they tried to get at each other's heads but once their harnesses were attached to a single chute, they seemed to sense they were in the thing together.
